INTRODUCTION

Teaching is a fundamental purpose of the University of Florida and the dissemination of new knowledge in our classrooms, studios, and clinics enables our students and trainees to fully explore their intellectual boundaries. Assessment and evaluation of our courses are designed to enhance instruction and maximize learning to meet the mission of the university. This report contains the results gathered through the new GatorEvals system. Students were invited to share their feedback on the teaching and course material. We invite every faculty member to examine the analysis in the report and utilize the resources provided in the report. Thank you for your continued great work!

Chris Hass, Ph.D.

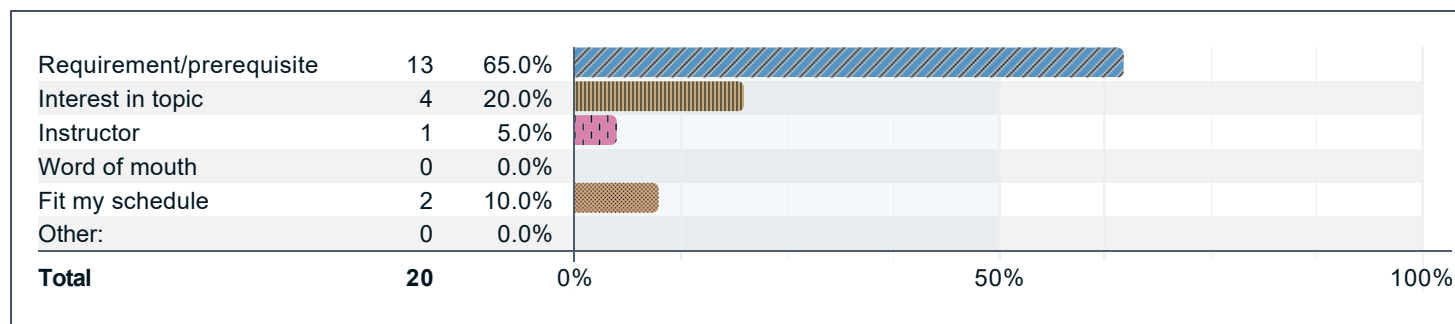

Associate Provost for Academic and Faculty Affairs

Resources to help you with this report:

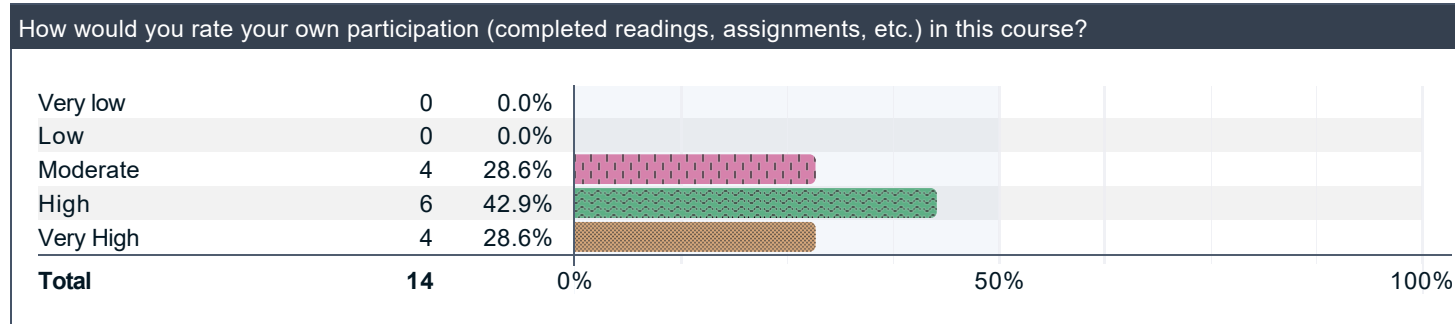

1. Consult our [GatorEvals Guide](#) for interpreting and using teaching survey results.
2. [Register for Elevate](#), a new Center for Teaching Excellence (CTE) initiative to help you create a customized trajectory for professional development, focusing on growth in areas you have identified through self-reflection.
3. GatorEvals offers the ability to [opt-in to a midterm](#) evaluation. This formative feedback offers you a chance to address student insights and adjust the course before the term concludes. Reports are only available to you and are not considered part of the T&P process.
4. Register and attend a [CTE workshop](#).
5. Schedule a [consultation](#) with a CTE staff member or your internal unit to help you interpret your results and develop a course of action.
6. Visit the [CTE Resource Library](#) for additional support.

Student Self-Evaluation Questions

Why did you take this course?

How would you rate your own participation (completed readings, assignments, etc.) in this course?

How would you rate your own participation (completed readings, assignments, etc.) in this course?

Response Count	Response Rate	Mean	IM	DPT Mean	DPT IM	College Mean	College IM
14	50.0%	4.00	4.00	4.02	4.07	4.13	4.20

University Core Instructor Evaluation Questions

	Response Rate	Mean	IM	SD	DPT Mean	DPT IM	College Mean	College IM
The instructor was enthusiastic about the course.	50.0%	4.21	4.30	0.80	4.74	4.88	4.52	4.75
The instructor explained material clearly and in a way that enhanced my understanding.	50.0%	3.86	4.00	0.95	4.42	4.70	4.26	4.61
The instructor maintained clear standards for response and availability (e.g. turnaround time for email, office hours, etc.)	50.0%	4.64	4.80	0.63	4.62	4.80	4.46	4.71
The instructor fostered a positive learning environment that engaged students.	50.0%	4.57	4.72	0.65	4.55	4.79	4.40	4.69
The instructor provided prompt and meaningful feedback on my work and performance in the course.	50.0%	4.21	4.50	0.89	4.20	4.60	4.19	4.57
The instructor was instrumental to my learning in the course.	50.0%	4.00	4.17	1.04	4.32	4.70	4.14	4.57
Overall	50.0%	4.25	-	0.84	4.47	-	4.33	-

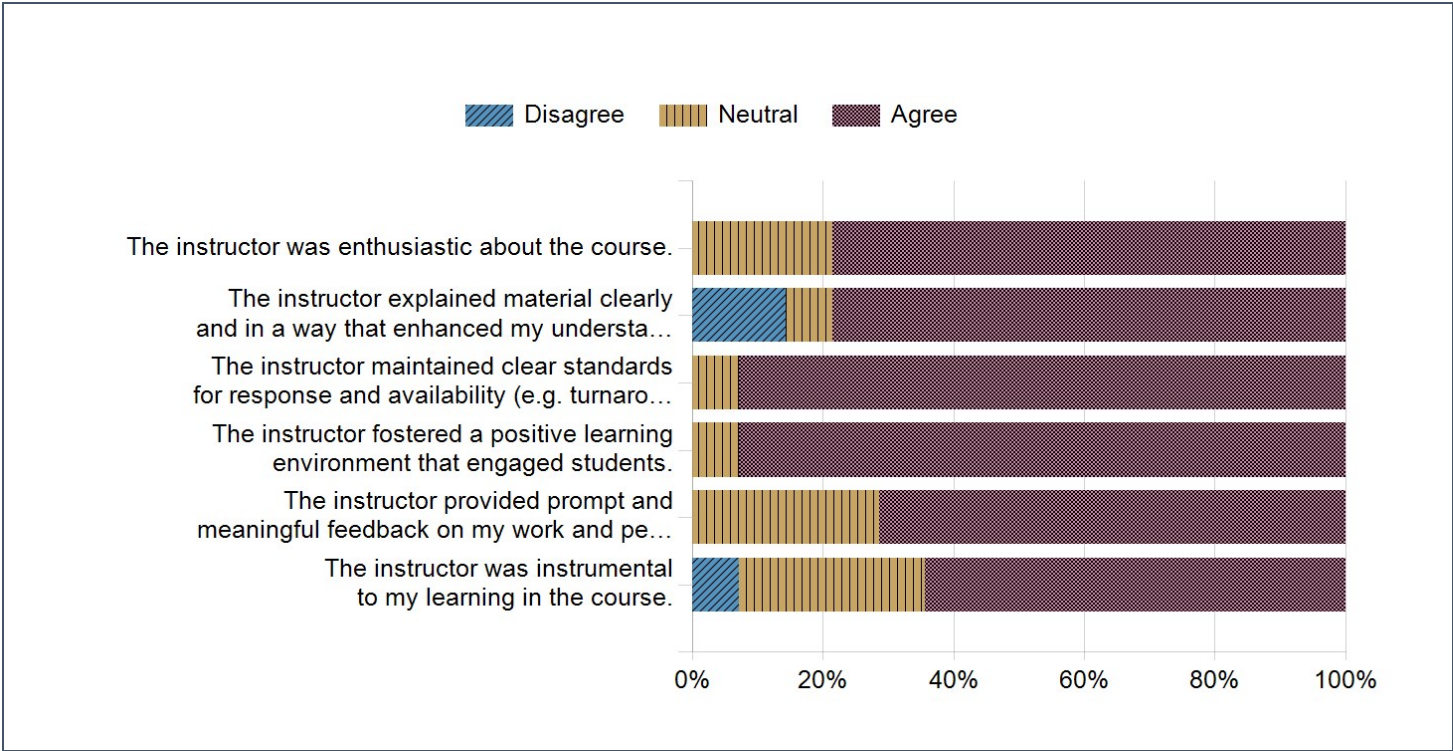

University Core Course Evaluation Questions

	Response Rate	Mean	IM	SD	DPT Mean	DPT IM	College Mean	College IM
Course content (e.g., readings, activities, assignments) was relevant & useful.	50.0%	4.50	4.72	0.76	4.23	4.34	4.22	4.33
The course fostered regular interaction between student and instructor.	50.0%	4.21	4.50	0.89	3.91	4.12	3.95	4.15
Course activities and assignments improved my ability to analyze, solve problems, and/or think critically.	50.0%	4.64	4.72	0.50	4.15	4.34	4.18	4.32
Overall, this course was a valuable educational experience.	50.0%	4.36	4.50	0.74	4.28	4.47	4.22	4.39
Overall	50.0%	4.43	-	0.74	4.14	-	4.14	-

Free Response Section

Please identify the instructor's strengths that contributed to your learning in the course.

Comment
Pedro was amazing. He provided great lectures + phenomenal lecture notes. This really helped me to not only learn, but prepare properly to exams. He is amazing!
Passion on the topic was a strength.
Professor Pedro was very enthusiastic and passionate about the course which translated into my personal enjoyment in learning the material. He was very responsive and supportive in answering any questions we had.
He is very kind and wants to make sure you understand the material. He will work with you until you understand for as long as you need! He is also forgiving if you have to miss class for illness or some other real reason and will make sure you are up-to-date.
He was very organized and caring about students learning. I also loved that he posted the notes after the class; it helped my organization in studying for exams
He had a well-organized and planned course. The material he gave and went over was vital to doing well on exams.
I had a wonderful time learning from Professor Pedro. He had very very organized lecture notes and the in-class assignments helped me digest class lectures very well. He was always open to answering any questions the class had during lectures, and stayed after class answering them as well. I appreciated how he wrote everything down on the board (and always checked with us before erasing something and moving onto the next topic!). Something Professor Pedro does that helps me understand the material is not just go through steps and motions of solving problems, but allocating time to helping the class understand the intuition behind concepts, which is my favorite, and what I believe is the most effective, form of learning.
The professor seemed to have a passion for economics.
When there was any confusion over a certain topic, Pedro never hesitated to go back and fully explain a concept to ensure that the student understood before moving on with the lecture. I also preferred the lecture not being a powerpoint, but instead being done by hand and allowing to see a step by step progression of the concept that was being taught. I found that the speed at which Pedro went through topics was good a fostered a deeper understanding of each concept.
Very willing to explain things to students and transparent about what will be and won't be on exams.

What additional constructive feedback can you offer the instructor that might help improve the course?

Comment
Making the home works multiple attempts.
Sometimes the writing on the board was kind of unclear because he was rushing.
It was very difficult to understand him. He would sometimes cut himself off, and it seemed as though he had a hard time finding the right words to get his point across (a very nice professor though).
I don't have much constructive feedback – I thought everything was superb. I visited Professor Pedro during office hours, he went over exams, posted answers to in–class assignments in a timely manner, and ensured we had the resources to affectively prepare for exams.
I felt like it was hard to follow at times during your lectures. I felt that the lectures went longer than what they needed to. A lot of lecture time could have been done through powerpoints instead of writing on the board, this would have saved you and the students time. It was nice going through the problems during class though.
While a minor issue, the ability to understand handwriting on the board was hard to understand at times, so maybe just making an effort for the handwriting to be clearer.
It feels like the course could've been simplified a lot with sets of slides instead of writing everything on the board by hand. Most of the classes consisted of writing a bunch of definitions by hand on the board that could've just been on a slide. It could really be a 2 or 3 credit hour course if the pacing was the same as most other courses at UF.

What constructive suggestion(s) do you have for improving the course materials, organization, and assignments?

Comment
Make homework assignments multiple attempts.
I would want homework to be less accuracy and more completion to encourage learning the material. Giving multiple chances to get the problem correct would also give students the security in trying out the problem without immediately feeling the need to look at notes or other resources to get the points.
I thought the material and assignments were all very helpful especially to use for studying for the exams.
I think the in–class assignments should be a bit shorter. I always was in a rush to get to another commitment I had outside of class. I think that part of the assignment can be done in–class while the remaining can be brought home.
I think Professor Pedro organizes the Canvas very well. I think the course materials (textbook, files tab, announcements) is great. Maybe if there is a way to post HW due dates so it shows up on Canvas calendar would be great!
Organization of the class was good and fair
Having the homework grades done on MyLab imported weekly into the gradebook on canvas so that a student can know where they stand on their overall grade.
No real complaints other than the MyLab assignments not being tracked on canvas and instead having to be tracked through the announcements made about them.

Please identify the topics and/or skills you learned in the course that you believe will have the highest application for future courses or professional growth.

Comment
The most applicable skill is determining the cause and effect of upstream and downstream revenues and costs.
I think the topic that would have the highest application for professional growth would be understanding price discrimination and vertical integration as in a future company I may be faced with a company merger or integration that could affect my job prospects or running of the company.
I think the topics applied to actual managerial decision making will help students a lot in future courses and careers.
I became more familiar various marginal cost graphs and equations that helped me succeed in others classes, namely Environmental Economics.
Collusion, importance of MR, MC, different types of markets (competitive, oligopoly, monopoly), the rationale behind how businesses make pricing decisions
How to use application of derivtives to business ideas
How to use formulas to find the actual values of Marginal Revenue, Economic Profit, equilibrium price/quantity, etc.
